

ABUS GRANIT Sledg 77 grip

Tootekirjeldus

The Abus Granit Sledg 77 Grip Brake Disc Lock holds your brake disc in a vice-like grip. Once it's attached, nobody's going anywhere with your motorcycle. Any attempted attack by thieves is met with powerful resistance from Abus.

How it works: Open the lock, let the locking bolt slide slip out. Then pass the bolt through the brake disc from the inside, push the lock body up to the bolt, and lock with the key. Job done.

- 13 mm locking bolt made from hardened special steel
- Extreme protection against motorcycle thieves
- Locks the brake disc
- Compact, easy to use and secure
- Sliding mechanism for ease of handling
- ABUS XPlus lock cylinder provides top-level anti-pick protection
- Non-slip, protective rubberised sheath

Specs:

- Shackle thickness: 13 mm
- Weight: 780 g
