

ABUS 140/120

Tootekirjeldus

ABUS offers a wide range of security latches at different security levels. You can recognise these hasps, for example, by concealed screws. In addition, hardened steel eyelets for the padlock shackle are encapsulated inside the hasp and thus provide optimum protection against break-in attacks. Together with the appropriate padlock, the hasp then ensures the highest level of security when securing the door and gate. The strong ABUS 140/120 Diskus® hasp is suitable for flush doors, i.e. the door panel and door frame are on one level. The design is matched to the original ABUS Diskus® padlocks so that the shackle is shielded against unlocking tools.

Technologies:

- Hasp and hinge pins made of stainless steel
- Tough construction
- Hinge pins protected against attack
- Hardened staple
- Ideal in combination with Diskus® padlocks
- Hidden screws
