<p>Steel-O-Flex™ Centuro 860/85 cable lock has a cable thickness of 8 mm and a shackle thickness of 8 mm. The lock is made of high-quality, specially hardened steel, which encases the inner steel cable and thus provide double security. This makes it much more difficult to cut the cable than with a simple cable lock. We recommend using the Steel-O-Flex™ Centuro 860 primarily for securing good bikes and as protection in areas with a medium risk of theft.</p>
