

ekey dLine kontrollor

Tootekirjeldus

With its relay, the ekey dLine control unit controls a motorized lock to open front, basement, or side entrance doors. In addition, it has an input for external opening, such as via door stations. In combination with the ekey dLine fingerprint scanner, the door features smart functions beyond keyless opening, so that the intelligent use of a building begins at the front door. The system is administered using the free ekey bionyx app.

Control unit:

- Number of relays: 1
- Number of inputs: 1
- Temperature resistance from -25 °C to +70 °C
- Suitable for built-in fitting in the door
- Recommended mounting with the ekey dLine control unit mounting plate
- Status display via dual LED (green/red)
