The ekey flush mount back box for the ekey finger scanner integra is a mounting box made of steel, which enables flush-mounting installation of the ekey finger scanner integra in a cavity wall without a front plate. The ekey flush mount back box for the ekey finger scanner integra is intended for use in both domestic and business applications. This ekey flush mount back box is designed for fixed mounting in cavity walls and for use in indoor and protected outdoor areas. The ekey flush mount back box for the finger scanner integra is an optional component that can only be used in conjunction with the ekey finger scanner integra.
