

Võtmete lõikamismasin Keyline Versa

Tootekirjeldus

- This is a computer-guided machine equipped with an up-to-date database containing the codes and technical parameters for optimal key cutting.
- Thanks to its innovative spindle, operating at 28,000 RPM, the encoding of one side of the key requires only a few seconds, thus guaranteeing exceptional results.
- Cutting quality is very high and in the case of dimple keys, a 3D cut is used, by operating the machine's 3 axes simultaneously.
- Versa is equipped with four standard clamps for all types of vehicle keys, and one master clamp for cylinder keys.
- Versa can also be used to personalise the key metal bows with graphic engraving.
