

A vertical brass-colored metal component, likely a door latch or handle part. It features two circular holes at the top and bottom. In the center, there is a locking mechanism with a small rectangular protrusion and a spring-loaded pin. The component is shown against a white background with a faint, diagonal watermark reading "LukuCentrum".

- Material: zinc
- Finish: JME (golden brown)
- Typical application: roll lock for light communication doors
- The roller latch protrusion can be adjusted by means of a screw on the front plate
- The door must have a door pull

- Compatible products:**
- Striker Plate: [0046](#), [0078](#)
