Tootekirjeldus

ABLOY padlocks provide maximum resistance against physical attack. The hardened, free-spinning protection plate prevents drill bits from penetrating the lock. Further security is provided by the hardened stainless steel ball bearings locking the shackle at both ends. The highest security can be provided by non-rekeyable construction.

The unique rotating disc cylinder system employed in ABLOY padlocks is effectively pick-proof and enables an extraordinarily wide range of comprehensive master keying options.

An all-purpose padlock of durable construction for storage doors, motorcycles, gates, trailers, power station switches etc.

Equipped with stainless steel shackle, diameter 5 mm.
