

The image displays two views of a circular metal fastener. The left view shows the front of the fastener, which has a polished, reflective surface. It features a central circular element with a diamond-shaped cutout, flanked by two red, semi-circular components. Below these are two small, circular, recessed areas. The right view shows the back of the fastener, which has a similar polished surface. It features a central black, rectangular component, flanked by two blue, semi-circular components. Below these are two small, circular, recessed areas. The fastener is shown against a white background.

[illegible]
